Macco

Super Automatic Coffee Machines

Our technologies

Our machines are designed and manufactured by a qualified and highly skilled team: every day, Carimali staff are dedicated to keep up innovative performances and top quality standards.

A key-role is played by our major investments in R&D, that allow us to launch brand new products at a very fast rate and always offer new solutions to our customers.

Barista Steam Wand:
steam wand with temperature probe to heat and froth milk automatically at the desired temperature, ideal for two-step machines
CoffeeCreator:
useful tool to be installed on any computer to set the parameters of our new generation super automatic machines directly from the computer

CupSense:
detect the presence of small or big cups and dispense the right drink accordingly (i.e. small cup for espresso and big cup for cappuccino)

FridgePlus:
detect over temperatures of milk and consequently stop milk-based drinks; detect empty milk cartons and stop milk-based drinks

MaxSave:
patented technology to maximise energy saving, guarantee high production capacity and reduce power consumption

MTT Milk Tuning Technology:
dispense milk-based drinks at the desired temperature; dispense cold milk and chilled beverages; store the fridge under the counter

PowerCleaner:
assure maximum hygiene conditions of the complete milk circuit and steam boiler through an integrated rinsing system

TFT 5.7" Graphic Display:
drink selection icons, images and commercials can be easily customised; online assistance and clear graphic user instructions

USB Connection:
copy and load machine parameters and settings, customise user interface graphics

In every situation, being it an office coffee break, hotel breakfast or any locations that look for excellent performances, Macco machines will deliver an extensive variety of delicious coffee, milk-based and chocolate drinks all automatically, without the need of trained baristas!

Through our extensive know-how and experience, we offer reliable, affordable coffee equipment that guarantee the highest quality standards that will enhance the speciality coffee offer in every establishment and generate high returns.

MX-2

If you are looking for a speciality machine, designed for low to medium demand, then MX-2 is the perfect answer to offer the same outstanding quality performances of Macco super automatics.
The excellent price/quality ratio will convince you to make the MX-2 your coffee machine best choice.

Recommended daily production 100-150 cups

Drink	Cups per hour*
